

Express Ranches **NEW MEXICO** **BULL SALE**

Wednesday
March 23, 2011
1 p.m. (MST)
at the Cuervo Creek Ranch
Newkirk, New Mexico

SELLING 101
ANGUS BULLS

70 Fall Yearlings :: 31 Spring Yearlings

On Behalf of Express Ranches, Welcome...

Welcome to the Second Express Ranches New Mexico Bull Sale to be held at the Cuervo Creek Ranch, Newkirk, New Mexico. These bulls have been developed on high roughage diet in the semi-arid terrain of New Mexico at 4,800-ft. elevation. These bulls are stout, full of muscle and ready to go to work. They will get out and travel the country and have the disposition which cattlemen demand.

We want to give a special thanks to Mark Whetten, Donny Estrada and the crew from the Cuervo Creek Ranch for their excellent care and development of this great set of bulls.

One of the most important decisions cattlemen have to make is bull selection. Proper bull selection allows us to optimize opportunities to turn a profit and maximize and, labor and cowherd. At Express, we constantly strive to blend technology with common sense to supply you with the best bulls we can produce.

If John, Kevin or I can assist or answer any questions or supply additional information, please don't hesitate to call.

Sincerely,

Jarold Callahan

Bob Funk, owner :: Jarold Callahan, president

BULL GUARANTEE

All bulls selling have passed a Breeding Soundness Exam 30- 45 days prior to the sale. We feel this is the best estimate we have to predict bulls that will go out and service as many cows as possible in the required time period.

Although all bulls have passed a BSE, we know certain problems can arise after you receive your purchase. To help ensure your investment, Express Ranches will guarantee all bulls selling for \$1,500 or more against breeding injury, and to be sound breeders for the first breeding season. **Breeding season is defined as the 90-day period following the first turnout of the bulls.**

This means that if you don't intend to use the bull for some time after purchase, we suggest an additional BSE by your Licensed Vet to assure the highest conception rates possible.

Checking your bulls prior to turn out each year is cheap insurance to assure your bull is ready to go!

If a problem arises, contact us and we will provide a replacement bull if available, or if the buyer prefers, credit toward a bull will be given in the upcoming sale, less salvage value of the injured bull. Please notify us as soon as possible should injury or problem occur and prior to the injured bull being sold for salvage.

VOLUME DISCOUNTS

In an effort to show our appreciation to our loyal customers, we once again will be offering our **VOLUME DISCOUNTS!** Remember, if you need a large number of bulls we have you covered!

5-9 BULLS

WE'LL TAKE OFF 5% PURCHASE PRICE AT SETTLEMENT

10 OR MORE, MAKE IT 10%

We hope this will make it a little easier to fill the truck!

Calving-Ease Rating

- ★ ★ ★ ★ Excellent calving-ease, use with confidence on any type of heifers.
- ★ ★ ★ Superior calving-ease, should work with most heifers and most situations.
- ★ ★ Moderate calving-ease, most people will use these bulls on cows, but they can be used on heifers if calving-ease is of less concern.
- ★ We recommend these bulls for use on cows.

Express Ranches Bull Development

These Express Ranches' bulls have been developed on a high roughage diet in the semi-arid terrain of New Mexico at 4,800 ft. elevation since the summer of 2010. Complete performance records, EPDs and ultrasound data will be available on the bulls. Bulls will be trich and fertility tested. This group of bulls is stout, full of muscle and ready to go to work. These bulls are hard-footed and will get out and travel the country.

Express Ranches Herd Health

Recommended by Dr. L.D. Barker, Professional Animal Health, Newcastle, Oklahoma

TIMING	PRODUCT SUGGESTION
Birth	CalfGuard (if needed) ¹
3 Months	Bovi-shield Gold 5 Cavalry 9 Microplasm/Pasturella Implant
Weaning	Bovi-shield Gold FP5 VL5 HB Cavalry 9
14 Days Postweaning	BV Gold FP5 VL5 HB/Cavalry
Prebreeding (heifers/developing bulls)	Bovi-shield Gold FP5 VL5 HB Deworm
Prebreeding (cows/bulls annually)	Bovi-shield Gold FP 5 VL5 Deworm
Pregnancy Exam (cows/bulls annually)	Leptoferm 5 Deworm

Dr. L.D. Barker

¹ Rota-corona virus vaccine administered prior to nursing.
² May be given to calves nursing pregnant cows if cows have been vaccinated within the previous year with Bovi-Shield (or PregGuard).

Notes

No more than three gram (-) vaccines administered at one time "5-way" Lepto administered twice annually (~ 6 month intervals) in "high risk" herds and once annually in "low risk" herds Bovi-Shield may be used in calves nursing pregnant heifers/cows or in pregnant heifers/cows if the heifers/cows were vaccinated within 12 months. Bovi-Shield must be given initially to open females.

ScourGuard 3 (K)/C should be administered pre-calving if calf scours is a problem. This should be administered twice (at least two weeks apart) the first year, with the second dose given 2-3 weeks before calving. A single annual booster may be given 2-3 weeks before each subsequent calving. Heifers' calves are twice as likely to develop scours as calves born to mature cows.

LOT 1

Lot 1 is powerful from all angles.

We give a special thanks to Mark Whetten, Donny Estrada and the crew from the Cuervo Creek Ranch for their excellent care and development of this great set of bulls.

A black and white photograph of three black Angus bulls standing in a field of tall grass. The bulls are the central focus of the image, with one in the foreground and two slightly behind it. The background is a soft-focus field of grass.

EXPRESS...

**more than just a name,
it's a program...**

With a management team led by a man who has spent more than four decades involved intimately in the cattle feeding industry in addition to his time in the academic community as a judging team coach and instructor and his tenure as the executive officer of the Oklahoma Cattlemen's Association, it comes as no surprise that the focus of the breeding program at Express Ranches is producing cattle that perform in the feedlot and earn premiums on the rail. Jarold Callahan will tell you quite simply, "we want cattle that do it all."

As the new millennium arrived on January 1, 2000, a new era at Express began with the arrival of the first calf crop by Bon View New Design 1407, the bull who would become the icon of the Express Angus program after selling a one-third interest for \$275,000 at the 2000 Bases Loaded Sale at Coors Field during the National Western Stock Show. New Design 1407 has become one of the most widely used sires in Angus history and is the true standard of combined growth and carcass excellence that has been at or near the top of the Angus breed for progeny registered for most of the first decade of the millennium. As of this writing, New Design 1407 records one of the top five Marbling EPD values among proven Angus sires and 23,253 progeny scanned have a phenomenal average IMF ratio of 105. Regardless of how he and his progeny have been measured — harvest data, ultrasound data or DNA analysis — New Design 1407 comes to the top with the new Pfizer 50K DNA technology assigning him a Feedlot MVP value of 240 that is surpassed only slightly by his paternal brother G A R Predestined to place them at the very pinnacle of the DNA tested population for combined growth and carcass breeding value. On April 5, 2002, a new record was set at the famous Midland Bull Test when the bull that would be renamed BR Midland sold for \$202,000 to the partnership of Express and Whitestone Krebs that also have shared the ownership of New Design 1407. Used with phenomenal success as the bull to add another generation of marbling greatness to daughters of New Design 1407, Midland has ranked among the top 5% of Angus sires for Marbling EPD throughout his life and as of this writing he has 13,946 progeny scanned with a nearly unbelievable average IMF ratio of 107.

On January 1, 2005, another important day in Express history began with the birth of the bull that would be named EXAR 263C after two-thirds interest of him sold for \$263,000 to set a still standing record at the 2006 Express Bull Sale. This son of New Design 1407 from a dam by Midland is proving himself to be the bull that will advance the legacy of these two cornerstone sires of the Express breeding program. As a heifer's first natural calf, EXAR 263C combined an adjusted 205-day weight of 873 lbs. and an adjusted 365-day weight of 1,505 lbs. with an IMF ratio of 132 and an adjusted URE measure of 16.7 square inches for a URE ratio of 123. As of this writing, EXAR 263C ranks among the top 15 proven sires in the Angus breed for \$Beef index with 1,524 progeny scanned recording an average IMF ratio of 104. In the 2009 Express Bull Sale, EXAR Unstoppable, an EXAR 263C son, topped the day when he sold half interest for \$102,000 and a crowd favorite, EXAR Beef Prod, another EXAR 263C son, sold half interest for \$44,000. Purebred and commercial cattlemen have come to appreciate EXAR 263C with 30 sons from his first calf crop selling for an average of \$5,382 in the 2008 Express Bull Sale while 64 sons sold for an average of \$5,564 in 2009 with 31 sons selling for an average of \$4,410 in 2010.

The search for the next source of superior marbling genetics to mate to daughters of Midland from dams by New Design 1407 led Express to Ellsworth, Kansas in the spring of 2005 to the Green Garden herd that was among the first in the Angus breed to concentrate on creating and selecting cattle that excel in the marbling trait that is the primary reason the Angus breed dominates the beef industry in the same manner that the Holstein breed dominates the dairy industry. The bull that would be named Gardens Prime Star recorded an adjusted IMF score of 9.10 for a ratio of 177 in a herd where marbling has been the primary focus and the emerging technology of using DNA markers to identify traits in the beef genome agreed with the individual ultrasound reading and another star was born. Since data from progeny ultrasound scans began to accumulate, Prime Star has been at or very near the pinnacle of the Angus breed for Marbling EPD and as of this writing Prime Star has 1,450 progeny scanned with an average IMF ratio of 109 and records the Number 1 Marbling EPD among proven Angus sires that are both AMF and NHF.

The 2007 calf crop at Express produced the son of Midland that appears to be the one to advance that sire line. Combining an adjusted 205-day weight of 797 lbs. as a heifer's first natural calf with an adjusted 365-day weight of 1,315 lbs. while recording a IMF ratio of 117 and an adjusted URE measure of 16.7 square inches for a URE ratio of 116, EXAR Titlelist T011 continued the performance and sales tradition of EXAR 263C as half interest of him sold for \$125,000 to top the 2008 Express Bull Sale. In addition to his scan excellence, EXAR Titlelist showcased his phenotypic excellence as the Triple Crown Grand Champion Bull of the 2008 American Royal, the 2008 North American International and the 2009 National Western. As of this writing, EXAR Titlelist ranks among the top 1% of proven Angus sires for Marbling EPD with 70 progeny scanned recording an average IMF ratio of 108.

From his experience feeding cattle, Jarold Callahan is acutely aware that the feeding industry's greatest frustration with Angus genetics is having enough muscle in Angus-sired harvest cattle to allow the cattle to be fed to 800 to 1,000 pound carcass weights that optimize profit-potential in the feedlot without suffering the on-the-rail discounts for Yield Grade 4 and 5 carcasses. A concentrated effort to make sure that was not a problem with Express Angus bulls brought the Emblazon descendant BC 7022 Raven 7965 from the same 2005 calf crop as EXAR 263C to the Express program after he recorded an adjusted URE measure of 19.3 square inches for a URE ratio of 160 to earn him a non-parent RE EPD that was at the very top of the population. From the 2006 calf crop, Express added the Emblazon son Rito 6EM3 after he recorded an adjusted URE measure of 16.8 square inches for a URE ratio of 139 in the Wehrmann Angus herd. Using these two added muscle herd sires along with EXAR 263C who had an adjusted URE measure of 16.7 square inches at Express and EXAR Titlelist who also had an adjusted URE measure of 16.7 square inches at Express and the top 1% RE EPD sire Basin Franchise P142 beside the proven carcass sires Bextor and Predestined gave the 2009 calf crop at Express a massive infusion of added muscle genetics. Using the science of ultrasound to stack generations for a highly heritable trait, the red meat composition of Express Angus bulls quickly came to the forefront of the breed in both the show arena and the scanning chute.

After using his sire Objective as a proven comparison A.I. sire in the Express program, SydGen Sure Bet was added to the Express herd sire arsenal in the fall of 2008 as the record-selling fall yearling of the Sydenstricker program. Produced by a Lead On daughter whose dam is a full sister to the \$Beef index sensation B/R Ambush 28, this bull from the fall 2007 calf crop had an adjusted 205-day weight of 821 lbs. as a heifer's first natural calf, recording an adjusted 365-day weight of 1,311 lbs. and an IMF ratio of 123 with an adjusted URE measure of 14.3 square inches for a URE ratio of 104. The Interim Marbling EPD for Sure Bet ranks him among the top 1% of non-parent Angus bulls and marks him as a candidate to continue the marbling legacy of New Design 1407, Midland, Prime Star, EXAR 263C and EXAR Titlelist at Express Ranches.

The search for genetic advancement is ongoing and in the spring of 2010, Express joined forces with SandPoint Cattle Company to make Connealy Consensus 7229 the \$210,000 top-selling bull of the 2009 calf crop. As a heifer's first natural calf, this outcross for the New Design 1407, Midland and Prime Star descendants in the Express cow herd had an adjusted 205-day weight of 817 lbs. and an adjusted 365-day weight of 1,420 lbs. with an IMF ratio of 134 and an adjusted URE measure of 14.0 square inches for a URE ratio of 104.

As the advancement and proliferation of hand-held mobile communication devices continues and our society moves to "real-time" data for decision-making, the AGI subsidiary of the American Angus Association is now able to update the EPD and \$Index Values for Angus cattle on a weekly basis. This cutting-edge advance allows new phenotypic measures of weights and ultrasound readings to be incorporated with DNA markers for the most current and comprehensive characterization of the breeding value of animal that is possible in the beef industry.

EX UUBAR Ranch

Vacation Packages

575-376-2035

New in 2011

Take your next vacation with us on the ranch.

Cabin retreat and fishing packages available!

Enjoy a trail ride along the Santa Fe Trail, experience an authentic cattle drive on the Santa Fe Trail, or participate in our Deluxe Heritage Package that features the Western, Hispanic, and Native American Cultures. Enjoy the natural beauty and wildlife of Northern New Mexico. Custom packages also available. Book now for summer!

EX UUBAR *Ranch*

EXPRESS UUBAR RANCH

expressuubar.com

These Express Ranches' bulls have been developed on a high roughage diet in the semi-arid terrain of New Mexico at 4,800 ft. elevation since the summer of 2010. Complete performance records, EPDs and ultrasound data will be available on the bulls. Bulls will be trich and fertility tested. This group of bulls is stout, full of muscle and ready to go to work. These bulls are hard-footed and will get out and travel the country.

Plan to join us Wednesday, March 23, 2011, in Newkirk.

8:00 a.m. Viewing of Bulls :: 11:30 a.m. Lunch

1:00 p.m. Express Bull Sale
