75 LIMOUSIN & LIM-FLEX BULLS

225 ANGUS FEMALES

FRIDAY, MARCH 6, 2009

522 ANGUS BULLS

AT THE RANCH | YUKON, OKLAHOMA

On Behalf of Express Ranches Welcome...

2202 N. 11th Street
Yukon, Oklahoma 73099

Welcome to Express Ranches for our 15th Annual Spring Bull Sale. We cherish our past customers and appreciate your interest in our offering whether you are a past customer or if this is your first time to look over our genetics.

Our goals at Express have remained constant the past 15 years. We constantly strive to produce the best Angus and Limousin bulls possible and back those genetics with the best service in the industry. As we prepare for this sale, we recognize there is uncertainty in the economy and in the beef business. However we think when you analyze the beef industry there is cause for great optimism long-term as our cattle numbers are historically low and worldwide demand for beef continues to improve.

While our objective is to produce balanced trait, problem free cattle that have moderate birth weights with excellent growth, moderate milk and superior carcass traits for both marbling and ribeye, I felt I would highlight a few of the facts on the Angus offering. Of the 523 bulls, 360 are a 3.0 or less for Birth Weight EPD; 237 bulls have greater than a 15 sq. in. ribeyes; 395 bulls have adjusted Yearling Weights over 1,200 lbs. with 78 over 1,400 lbs. on Yearling Weight; and 113 head had a Yearling Weight EPD of greater than 100 lbs..

With all of us experiencing economic challenges, we feel one of the most important decisions we have to make is in bull selection. Proper bull selection allows us to optimize our opportunities to turn a profit and maximize our land, labor, and cow herd.

At Express we are constantly striving to blend technology with common sense to supply you, our customer, with the best bulls we can produce.

If Kevin, Mark, Donnie, Dustin, John, I or any of the crew can answer any questions or supply additional information don't hesitate to call.

Thanks for your interest,

Jarold Callahan

P.S.
ALL BULLS ARE TESTED AM-FREE

SALE SCHEDULE

WEDNESDAY, MARCH 4, 2009

12:00 p.m. - Bulls & Females Available for Viewing

EXPRESS RANCHES

Absentee Bidding Process

Live Internet Bidding will be available for the Express Ranches Spring 2009 Bull Sale

Express Ranches invites those who are unable to attend to be a part of the action!

We would never want to give someone an excuse to NOT attend our event, but if the situation arises, we have you covered. With the help of LiveAuctions.tv, we are now able to give you a live connection to the auction.

Real-time bidding will be available via the Internet for this sale. Live audio and live video will allow buyers to bid on animals as if they were present at the sale. Buyers must create an account prior to the sale. Please visit <http://LiveAuctions.tv> to create an account. Instructions are available at <http://LiveAuctions.tv> to walk you through the set-up process, contact Brad Fahrmeier at 816-392-9241 or brad@LiveAuctions.tv

LiveAuctions.TV

Also a first at Express Ranches, all Bulls will be seen BIGGER THAN LIFE!

Cattle In Motion Video and Promotions will video all bulls prior to the auction. All bulls will be on the BIG SCREEN at the auction. We feel seeing bulls in their natural state can be a huge advantage to you our customer. This will also allow us to send a video CD of all sale bulls to those of you who would like to get your homework done early. Please contact the Express Ranches office to reserve your copy. So whether in our bleachers or in your easy-chair, we hope you'll join us!

Cattle In Motion

BULL GUARANTEE

All bulls selling have passed a Breeding Soundness Exam 30- 45 days prior to the sale. We feel this is the best estimate we have to predict bulls that will go out and service as many cows as possible in the required time period.

Although all bulls have passed a BSE, we know certain problems can arise after you receive your purchase. To help ensure your investment, Express Ranches will guarantee all bulls selling for \$1,500 or more against breeding injury, and **to be sound breeders for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.**

This means that if you don't intend to use the bull for some time after purchase, we suggest an additional BSE by your Licensed Vet to assure the highest conception rates possible.

Checking your bulls prior to turn out each year is cheap insurance to assure your bull is ready to go!

If a problem arises, contact us and we will provide a replacement bull if available, or if the buyer prefers, credit toward a bull will be given in the upcoming sale, less salvage value of the injured bull. Please notify us as soon as possible should injury or problem occur and prior to the injured bull being sold for salvage.

VOLUME DISCOUNTS

In an effort to show our appreciation to our loyal customers, we once again will be offering our VOLUME DISCOUNTS! Remember, if you need a large number of bulls we have you covered!

5-9 BULLS

WE'LL TAKE OFF 5% PURCHASE PRICE AT SETTLEMENT
10 OR MORE, MAKE IT 10%

We hope this will make it a little easier to fill the truck!

FREE BULL DELIVERY TO CENTRAL POINTS

Transportation costs for livestock are currently at an all-time high. We also hope to limit the amount of unnecessary extra time bulls spend on the trailer in transit to your ranch. Because of these factors Express Ranches is implementing the following delivery policy.

The central points for delivery will include auction barns, vet clinics and ranches that offer to serve as a delivery point. We will map out the route after the sale and do our best to get your bulls to you as quickly and conveniently as possible.

We simply ask for your cooperation in arranging the delivery of your bulls. This will keep the bulls from being on the truck too long and therefore get your bulls to you in the best condition possible.

Please assist us by leaving the correct contact people and numbers so our staff can keep you informed as to the status of your delivery.

We will also be offering a **\$50 PER HEAD REBATE** for customers that arrange to pick up their bulls here at our sale location within one week of the sale.

Calving-Ease Rating

- ★ ★ ★ ★ Excellent calving-ease, use with confidence on any type of heifers.
- ★ ★ ★ Superior calving-ease, should work with most heifers and most situations.
- ★ ★ Moderate calving-ease, most people will use these bulls on cows, but they can be used on heifers if calving-ease is of less concern.
- ★ We recommend these bulls for use on cows.

Express Ranches Bull Development

All bulls are developed on a high roughage ration from weaning until sale time in large traps allowing them to get out and be bulls! We feed to obtain optimum performance while not sacrificing longevity! While extreme weights are impressive, we feel keeping cattle sound and functional are equally important. We have spent countless hours developing a feeding program that not only allows us to amplify the genetic potential, but keeps the cowman in mind that purchases him. All Bulls are on a 40-45% hay-based ration fed not over 3% of body weight. After all scan data is retrieved, bulls are backed off of feed, and hardened up to first turn out condition. This allows us to eliminate the bulls that fail to respond when conditioning for the upcoming sale.

To sum it up, we try to get the bulls into the same shape we like to buy them in!

Express Ranches Vaccination Schedule & Feeding Program

Recommended by Dr. L.D. Barker, Professional Animal Health, Newcastle, Oklahoma

TIMING	PRODUCT SUGGESTION
Birth	CalfGuard (if needed) ¹
3 Months	Bovi-shield Gold 5 Cavalry 9 Mycoplasma/Pasturella Implant
Weaning	Bovi-shield Gold 5 Spirovac ³ Cavalry 9
14 Days Postweaning	BV Gold 5/Cavalry/Spirovac
Prebreeding (heifers/developing bulls)	Bovi-shield Gold FP 5 VL5 Ivomec
Prebreeding (cows/bulls annually)	Bovi-shield Gold FP 5 VL5 Spirovac ³ Ivomec
Pregnancy Exam (cows/bulls annually)	Leptoferm 5 Ivomec

Dr. L.D. Barker

- ¹ Rota-corona virus vaccine administered prior to nursing.
- ² May be given to calves nursing pregnant cows if cows have been vaccinated within the previous year with Bovi-Shield (or PregGuard).
- ³ Spirovac should be administered to breeding animals twice at 4-6 week intervals the first year of administration. Spirovac should be administered as early in life as possible (after 4 weeks of age) to provide immunity prior to exposure and potential development of the carrier state. A preweaning/weaning period is included in the protocol. However, this could be given at branding (followed by a 2-4 week booster) or twice prior to breeding.

Notes

No more than three gram (-) vaccines administered at one time
 "5-way" Lepto administered twice annually (~ 6 month intervals) in "high risk" herds and once annually in "low risk" herds
 Spirovac administered twice the first year and once annually.
 Spirovac titers may be a problem for export requirements or AI centers. Consult your veterinarian or AI center personnel prior to administration to breeding animals destined for export or semen collection.
 Bovi-Shield may be used in calves nursing pregnant heifers/cows or in pregnant heifers/cows if the heifers/cows were vaccinated within 12 months. Bovi-Shield must be given initially to open females.
 ScourGuard 3 (K)/C should be administered pre-calving if calf scours is a problem. This should be administered twice (at least two weeks apart) the first year, with the second dose given 2-3 weeks before calving. A single annual booster may be given 2-3 weeks before each subsequent calving. Heifers' calves are twice as likely to develop scours as calves born to mature cows.

You're On Your Way To Receiving Premiums For Your Next Calf-crop.

Selling 1/2 Semen Interest and 1/2 Possession.
 Will see heavy service at Express Ranches.

As the lead-off bull of the 2009 Grand Champion Carload of Bulls at the National Western in Denver, Unstoppable grabbed the attention of several cattlemen as the big, stout son of EXAR 263C, the total performance sire, out of one of Jarold Callahan's all-time favorite females, EXT 1525.

The dam of Unstoppable possesses a truly unique combination of power, structural correctness, femininity and broodiness in one package. And even at almost 14 years of age, she is the picture of youth and exhibits incredible udder and teat quality.

Sisters of Unstoppable are quickly joining the ranks as elite and outstanding donor females for the Express Ranches ET Center.

WOW! Here is an excellent outcross option who is a son of Basin Chloe 812L, the \$250,000 Express, Basin and 44 Farms donor, which makes EXAR Unusual 81100 a maternal brother to Basin Franchise 142P, the calving-ease specialist. As the youngest member of the 2009 NWSS Grand Champion Carload and with the extreme Birth EPD (1.5) to Yearling EPD (+113) spread, this son of Objective 3J15 is certain to make his mark in the beef industry as an elite beef sire.

He should sire progeny with that same combination of performance, muscle and volume the sons of Basin Chloe 812L have become known to produce.

In an era of the highest corn, fertilizer and fuel prices in American history, the years ahead will place even greater demands on seedstock producers to produce and distribute the genetics for marbling so that harvest cattle can be fed cereal grains for a shorter periods of time and harvested at lighter weights or less days on feed without sacrificing the high quality end product that affluent consumers around the world continue to demand for the US beef industry.

This cornerstone of the Express breeding program continues to offer one of the top Marbling EPD values among proven sires after the combination and re-alignment of carcass and ultrasound data. His sons and daughters can be found throughout the lists of breed leaders for the trait that has given the Angus breed its dominant position in the beef industry. Daughters of this proven sire are becoming cornerstones in elite donor herds across America.

69 SONS SELL!

This son of New Design 1407 out of a BR Midland daughter set an Express record when two-thirds interest sold for \$263,000 as a spring yearling. Now he records one of the top Marb EPD values among proven Angus sires in the summary and combines his quality genetics with growth and cutability, recording one of the top \$B index for sons of 1407 in that same analysis.

While the art and science of breeding superior seedstock has, and always will be, more than “merely painting by numbers,” the EPD values that help producers define and compare the genetics of individuals are a yardstick that must be used to measure progress. By every measure currently known and seeing widespread use, the herd sires of Express set the pace for the rest of the beef industry.

90 SONS SELL!

The foundation Forever Lady female at Express Ranches produced the proven growth leader On Target; and in the fall of 2006, Express joined forces with a group of leading Angus breeders to make his son, Stevenson Moneymaker R185, the top-selling bull of the annual Stevenson Basin fall sale. With a birth weight of 81 lbs., an adjusted 205-day weight of 835 lbs. for a weaning ratio of 117, and an adjusted 365-day weight of 1,301 lbs. for a yearling ratio of 115, Moneymaker excelled at every stage with an IMF ratio of 109 and URE ratio of 104.

This son of a Pathfinder Dam offers outcross genetics to the New Design 1407 x Midland foundation at Express. In addition to the pedigree and EPD components that he brings, Moneymaker has impressed the staff at Express with his libido, durability and overall soundness in the pasture where he maintains his flesh while aggressively settling cows.

This flush brother to Lot 13, the lead bull in the Express Ranches 2009 NWSS Reserve Early Spring Pen, also is a stout-made, big-topped and stylish bull. His dam, "5116", is one of the top Express Ranches donor females to date. A maternal sister to Lot 104 commanded a top bid of \$110,000 as the high-selling bred heifer of the record-setting 2008 Big Event.

34 SONS SELL!

With the size of the ribeye muscle as the largest genetic driver and the limiting factor on improved USDA Yield Grades, the focus on marbling genetics at Express has not been single trait selection. Among the top 25 proven sires for RE EPD, one finds the Express herd sire Basin Franchise P142 who combines added muscle with a low BW EPD and superior marbling genetics.

BASIN FRANCHISE P142

LOT 359

Why so much emphasis on bulls?

BULLS HAVE THE GREATEST ECONOMIC IMPACT ON ANY BREEDING PROGRAM, THUS BULL SELECTION IS AMONG THE MOST IMPORTANT DECISIONS AND INVESTMENTS A COWMAN WILL MAKE DURING THE COURSE OF A YEAR.

SCIENTISTS HAVE LONG POSTULATED THAT OVER 80% OF THE IMPROVEMENT IN A HERD OVER TIME IS DIRECTLY ATTRIBUTED TO BULL SELECTION.

LOT 601

2009 National Western Reserve Grand Champion Limousin Bull

What an opportunity! EXLR Total Dominance 8008 made his first outing to a show at the 2008 NWSS in Denver, Colorado, as one of the bookends of the Grand Champion Limousin Pen in the yards! His second trip to a show was to the 2009 NWSS in Denver where he was crowned Reserve Grand Champion Limousin Bull on the hill!

Total Dominance 8008 has been a favorite of Jarold and Donnie's since the first time they saw him. His flawless structure and extremely thick and powerful top and rump is why many Limousin cattlemen found him to be one of the most exciting new bulls to surface in quite some time. And to add to this excitement and enthusiasm, Total Dominance has tested Homozygous Polled and Homozygous Black!

Ranks in the Top 30% for WW EPD and 10% for REA EPD.
Selling 1/2 Interest and 1/2 Possession After Show Career.

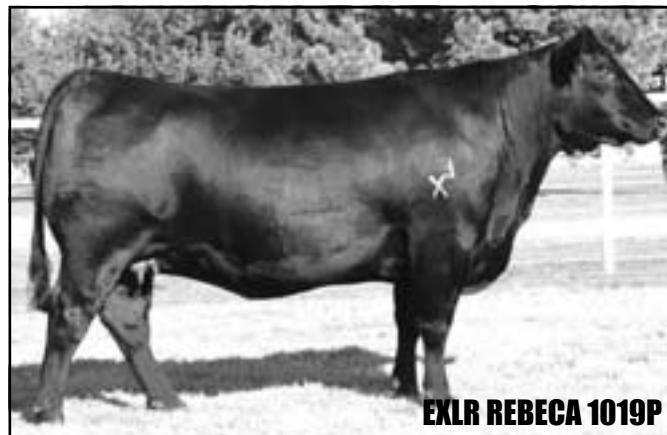

EXLR Unequaled 051U is named perfectly! The Division I Champion Lim-Flex Bull Calf at the 2009 NWSS is a son of the \$50,000 all-time top-selling Lim-Flex female and the First Triple Crown Lim-Flex Female, who was purchased by Joey Massey and Brown Land & Cattle at the 2008 Fast Forward sale. He has the right tools to be the next great Lim-Flex sire! And he has tested Homozygous Polled and Homozygous Black!

The Rebeca cow family has been the foundation of a good portion of the Express herd and when you see production like EXAR Unequaled you will see why they are so popular!

LIMOUSIN

Full Brothers to the Limousin Futurity Grand Champion Female & Bull

EXLR LUVLY 010T

EXLR TOTAL IMPACT 054T

It was a day for the record books when the Previous National Champion Limousin Female, EXLR Luvly 7127N (pictured below), entered the annals of Limousin history as one of the greatest-producing females of the Limousin Breed when her daughter and son were both crowned Grand Champions at the 2008 All-American Limousin Futurity. Lots 609-613 are full brothers to these two great champions. And Lots 614-620 are out of the same sire and the grandmother of EXLR 7127N!

Why so much emphasis on bulls?

Bulls have the greatest economic impact on any breeding program, thus bull selection is among the most important decisions and investments a cowman will make during the course of a year.

Scientists have long postulated that over 80% of the improvement in a herd over time is directly attributed to bull selection.
